1. Attached is a list containing data on larger Soviet fishing vessels. Section I lists fishing vessels which are based in the Baltic Sea. Certain of these vessels have left the Baltic since 1 June 1952 and have not returned. Four hundred and nineteen vessels totaling approximately 95,000 gross tons are included in this list.
 2. Section II consists of a list of fishing vessels based outside of the Baltic Sea. This list contains data on 723 vessels of approximately 215,000 gross tons.
 3. It is thought that the Soviet Union has many more fishing vessels than those listed in this attachment. The list of vessels contained in Section I is thought to represent the minimum number of the vessels of this type which are stationed in the Baltic.
 4. Certain ships which are identified as being located outside of the Baltic Sea are listed as having their home port in a Baltic port. These ships are described in this manner because at the time that they were most recently observed, this home port was indicated on the vessels themselves. Certain other ships which were sighted in the Baltic are listed in Section II of this report since their home ports were indicated on the vessels themselves.
